

Multi DRM reduces complexity

- › Common interface for different DRM technologies
- › Enables targeting wider range of devices
- › Simplifies client platforms development

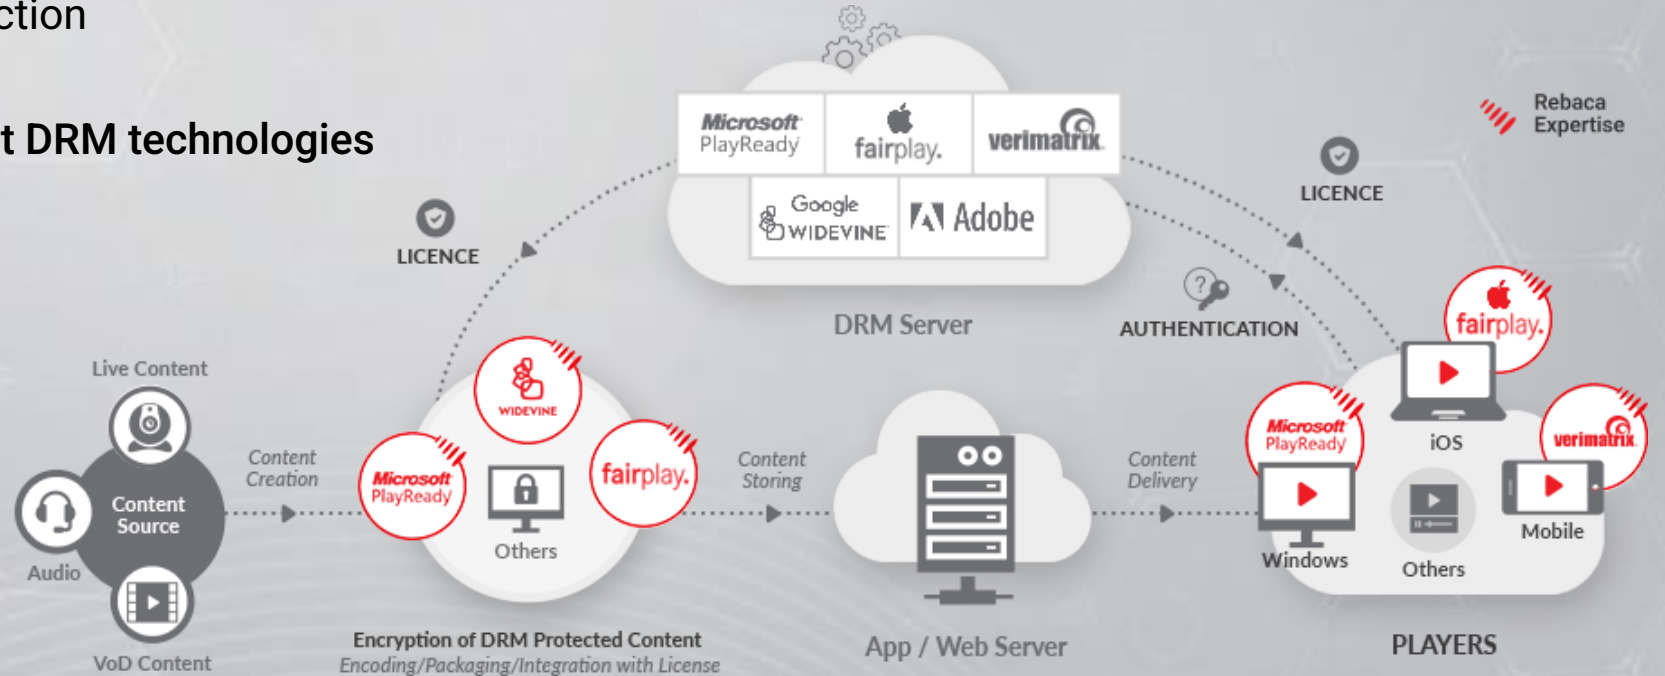

DRM Implementation and Integration expertise

› Custom DRM solution development for OTT industry

- End to end content protection

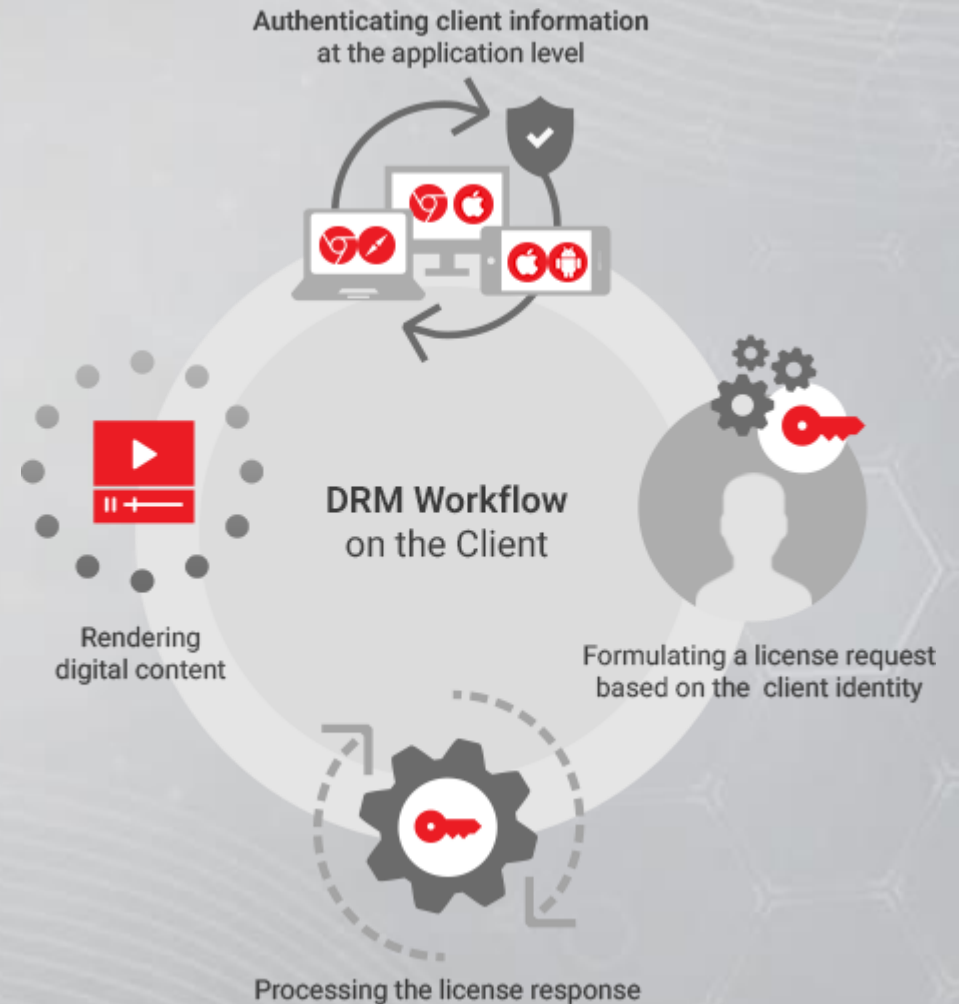

› Experience in integrating most DRM technologies

- Widevine
- Native iOS
- Playready
- Verimatrix
- FPS
- BuyDRM

Engineering Team Strength

- › Technology complexity
 - Encryption - AES, Sample-AES, CENC
 - Content specific keys
 - Key management
 - Key rotation
 - Offline playback
- › Complete product development – Design, PoC, implementation, integration and production
- › Client and Server DRM module
- › Packaging experience– CMAF, HLS, DASH, Encoding, Decoding, Transmuxing

Customer Benefits Delivered

- › Developed and deployed end-to-end content protection, content packaging, content delivery and content playback
- › License server components for PlayReady, Widevine, and FPS
- › DRM proxy - unified DRM interface for Widevine, Playready and FPS
- › Caching server cluster for encryption keys storage; reducing latency and ensuring higher throughput
